SHOWER DOORS - Sizing & Installation

See the STANDARD SHOWER section for Base, Walls and Door Kit pricing

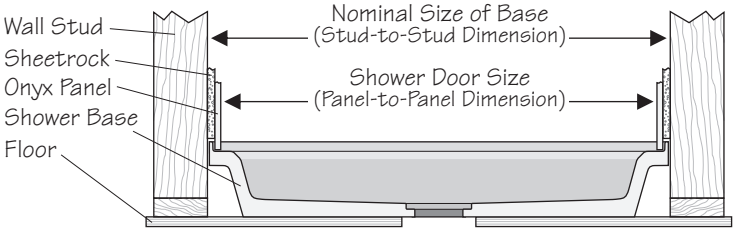

USE THE STANDARD or CUSTOM "SHOWER DOOR" ORDER FORMS TO ORDER ANYTHING IN THIS SECTION

KEY:

- **Level** - Being on a plane parallel to the horizon with no part higher than another
- **Plumb** - Being perpendicular, or straight up, from the horizontal plane
- **Centerline** - The line that divides the Shower Curb along which the glass panes will be positioned
- **Lite** - Industry term for a Glass Panel
- **Return Panel** - A Glass Panel that goes away from the front of the Shower
- **Frameless Door** - Door Lite has no metal framing
  - Side Lites have framing on bottom and wall sides
- **Semi-Frameless Door** - Door Lite has metal framing on hinge side only
  - Side Lites are framed on all sides

SHOWER DOOR SIZING - General

- When ordering a Door for any of our **Standard Showers**, simply state the size of the Shower Base as given in the catalog (for example, 36" x 36" Low Profile, or 36" x 32" Regular Profile).
- When ordering a Door for one of our **Custom Showers**, please issue a **SEPARATE Purchase Order #**, and include the Shower Base Order number on the Door Order Form as well.
- If ordering a Door for a **Shower not made by us**, specify if you are providing the Stud-to-Stud dimension (if not using our panels, specify panel/tile thickness), or the dimension between the finished walls (see drawing below).

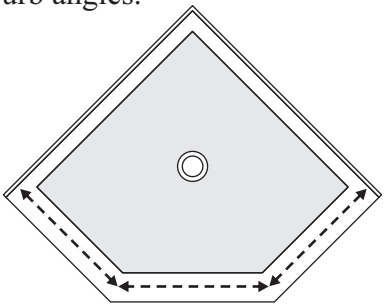

Subtract Sheetrock thickness (x2) + Panel thickness (x2)
from Stud-to-Stud Dimension to determine Shower Door Width
(Measure at the base and at 6' to make sure the walls are straight)

Measuring for Shower Doors

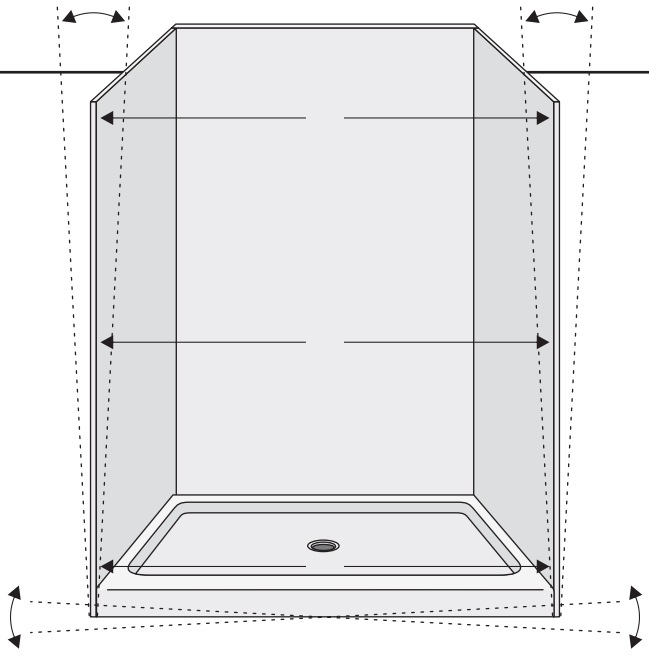

- Measure at the BASE of the opening.
- Measure HALF WAY between the base and the top.
- Measure at the TOP of the opening.
- Make sure Shower Base is level.
- Check the Side Walls for plumb.

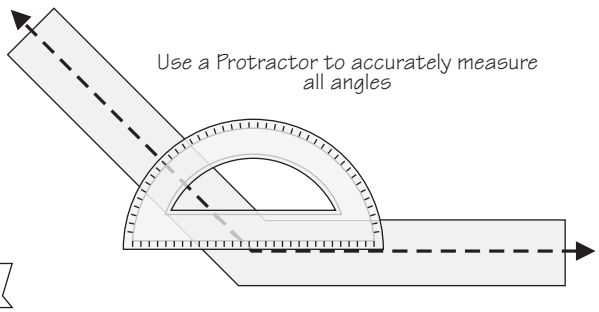

For ANGLED CURB Showers

- Give the Centerline dimensions of the Angled Curb.
- Provide all Curb angles.

The Centerline is an imaginary line that
divides the Shower Curb, along which
the glass panes will be positioned.

Use a Protractor to accurately measure
all angles

See the Ordering & Design Forms section for Measuring Work Sheets

SHOWER DOORS - Sizing & Installation

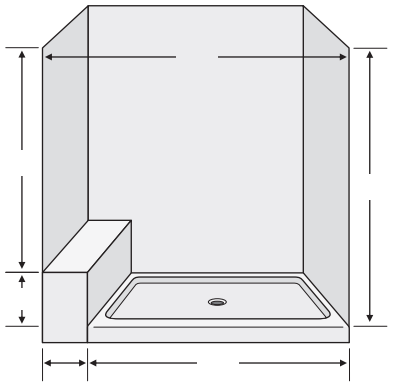

See the STANDARD SHOWER section for Base, Walls and Door Kit pricing

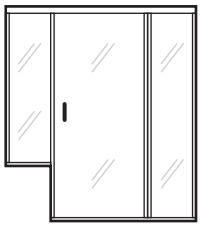

USE THE STANDARD or CUSTOM "SHOWER DOOR" ORDER FORMS TO ORDER ANYTHING IN THIS SECTION

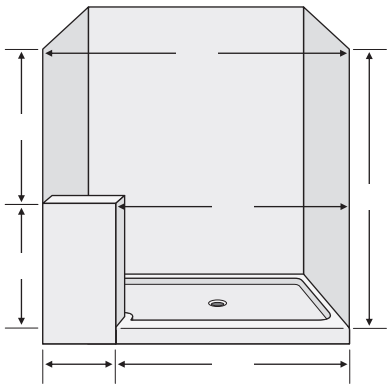

Measuring for HALF WALLS and BENCHES

Straight Line Shower Door

- ▶ Make sure the Shower Base is level
- ▶ Check Half Wall for Level (left/right)
- ▶ Check the Side Walls for plumb
- ▶ Measure the opening just above the Shower Base
- ▶ Measure the opening at the top of the Shower
- ▶ Measure just above the top of the Bench or Wall
- ▶ Measure Bench Seat slope (left/right)

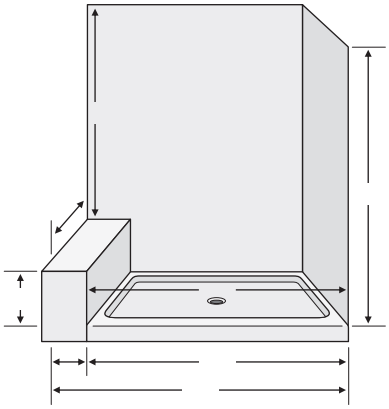

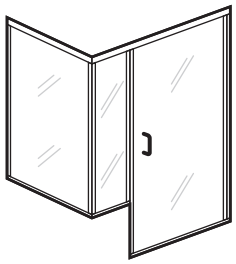

See the Ordering & Design Forms section for Measuring Work Sheets

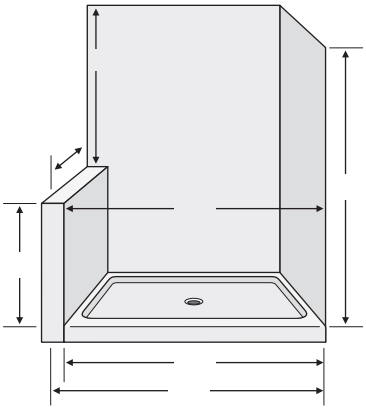

Measuring for HALF WALLS and BENCHES

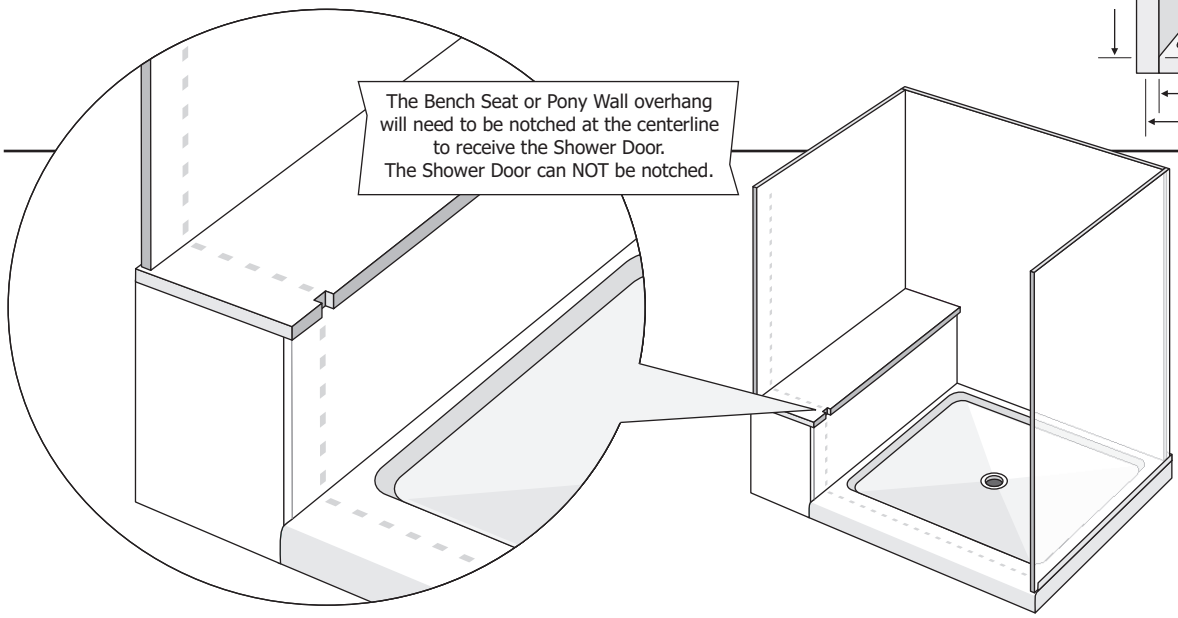

Shower Door with Return Panel

- ▶ Make sure the Shower Base is level
- ▶ Check Half Wall for Level (left/right & front/back)
- ▶ Check the Back and Side Walls for plumb
- ▶ Measure the opening just above the Shower Base
- ▶ Measure just under the top of the Bench or Wall
- ▶ Measure for the Centerline of where the glass will sit along the Half Wall or Bench
- ▶ Measure Bench Seat slope (left/right & front/back)
